

## CV Documentation - Part 1: Project Description

This document is meant to be used as a description to understand how I did this Angular app and as a guide to everyone who would like to do a similar website. The code is public, you can use it, replicate it and even upgrade it if you want.

This document would have some changes in the future, I would be adding new features and instructions so stay tuned for future versions.

This project uses a lot of bootstrap, if you want to replicate it through this guide, I suggest you to add it to your project (In case you don't know how to download it, check out the bootstrap official website <https://getbootstrap.com/docs/4.0/getting-started/introduction/>).

The project structure is very simple, there is only one module and 6 components attached to it. The components are: Menu, Home, Background, About, Contact and Play.
